

eClinicalWorks

PQRS 111 (NQF 0043) (CMS 127) - Pneumonia Vaccination Status for Older Adults

Description

Percentage of patients 65 years of age and older who have ever received a pneumococcal vaccine.

Reporting Frequency

Once per reporting period.

Denominator

Patients are included in this denominator if they meet ALL of the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They are 65 years of age or older	Patient Information
They have had an appropriate office visit during the measure	Progress Nment periodotes > Billing
	Note: The following E&M codes are considered appropriate encounters: 90732, 99201, 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215, 99341, 99342, 99343, 99344, 99345, 99347, 99348, 99349, 99350, G0402, G0438, G0439
Note: This measure assesses whether patients 65 years of age or older have received one or more pneumococcal vaccinations.	

Numerator

Patients in the denominator are included in the numerator if they meet at least ONE of the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They have had a pneumococcal vaccination recorded as an immunization	An pneumococcal vaccination can be recorded from one of the following locations: ■ Progress Notes > Immunization > Add Immunization > Pneumonia OR Given in past if any ■ Patient Hub > Immunization > Add Immunization > Pneumonia OR Given in past if any ■ Telephone Encounters > Virtual Visit > Immunization > Add Immunization > Pneumonia OR Given in past if any Note: One of the following CVX codes must be linked with the pneumococcal vaccination: 33, 100, 133
They have had a pneumococcal vaccination recorded as a procedure	A pneumococcal vaccine administration procedure can be recorded from the following location: ■ Progress Notes > Billing Note: The following CPT* codes can be linked to the pneumococcal vaccine administration to satisfy the numerator: 90669, 90670, 90732 The following CPT II code satisfies the numerator: ■ 4040F The following CPT II code does NOT satisfy the numerator: ■ 4040F with 8P modifier
Note: The following does NOT satisfy the numerator or exclude patients from the numerator: ■ Progress Notes > Immunization > Add Immunization > select the proper Pneumonia Immunization > Status drop-down list > Not Administered > Reason (any of the available reasons)	
Note: The following structured data does NOT satisfy the numerator or exclude patients from the numerator: ■ Progress Notes > Examination > CQM Exception > Pneumococcal Vaccine not Administered ◆ 01: Medical reason ◆ 02: No reason specified	
Note: While the measure provides credit for adults 65 years of age and older who have ever received either the PCV13 or PPSV23 vaccine (or both), according to ACIP recommendations, patients should receive both vaccines. The order and timing of the vaccinations depends on certain patient characteristics, and are described in more detail in the ACIP recommendations.

Setup

The following procedures are related to setting up this measure:

- CVX codes must be linked with immunizations from the New Immunization or Update Immunization window:

New Immunization

Imm/T. Inj: Immunizations

Imm/T. Inj Name: *

CPT Code: Sel

CVX Code: * Sel

Administration Code: Sel Clear

Dose:

VIS Information: ☒ None ☐ Single ☐ Multiple Add Remove

Date on VIS	Vaccine Name

☒ Export to the State Registry
☐ Mark as PPD

OK Cancel
