## PQRS 154 (NQF 0101) (CMS 139) - Falls: Risk Assessment

### Description

Percentage of patients aged 65 years and older with a history of falls that had a risk assessment for falls completed within 12 months.

**IMPORTANT!** This is a two part measure which is paired with *PQRS 155 - Falls: Plan of Care*. If the falls risk assessment indicates the patient has documentation of two or more falls in the past year or any fall with injury in the past year (CPT\* II code 1100F), PQRS 155 should also be reported.

\*. CPT only © 2014 American Medical Association. All rights reserved.

### Reporting Frequency

Once per reporting period.

### Denominator

Patients are included in this denominator if they meet ALL of the following criteria:

| Denominator Criteria                                                      | Area to Document within eClinicalWorks                                                                                                                                                                                                                                                                                                                                                                                                                                   |
